

Minnesota Law Enforcement Explorer Association

Directions to install the year registration

Hello, when you tried to open the Microsoft Access Database it gave you an error. Ok we need to try the alternative download. First to do this you will need to delete the file 2019StateConference_Registration that you installed.

Now you will need to download and install the alternative database. If you look below where you download the first file you will see the alternative process area.

Now download and install this file. Save it in the same area you used before. It will install only one file. 2019StateConference_Registration

After this file is installed and you are ready to get started. Please open the database.

Please look at the 2019 Advisor Changes PDF to get your started and also review the video that is also just below the download on our website.

Again, if you have any questions or issues please contact us.

Thank You
